

Guidance on Transferability assessment and long-term sustainability of target Shared Mobility Solutions

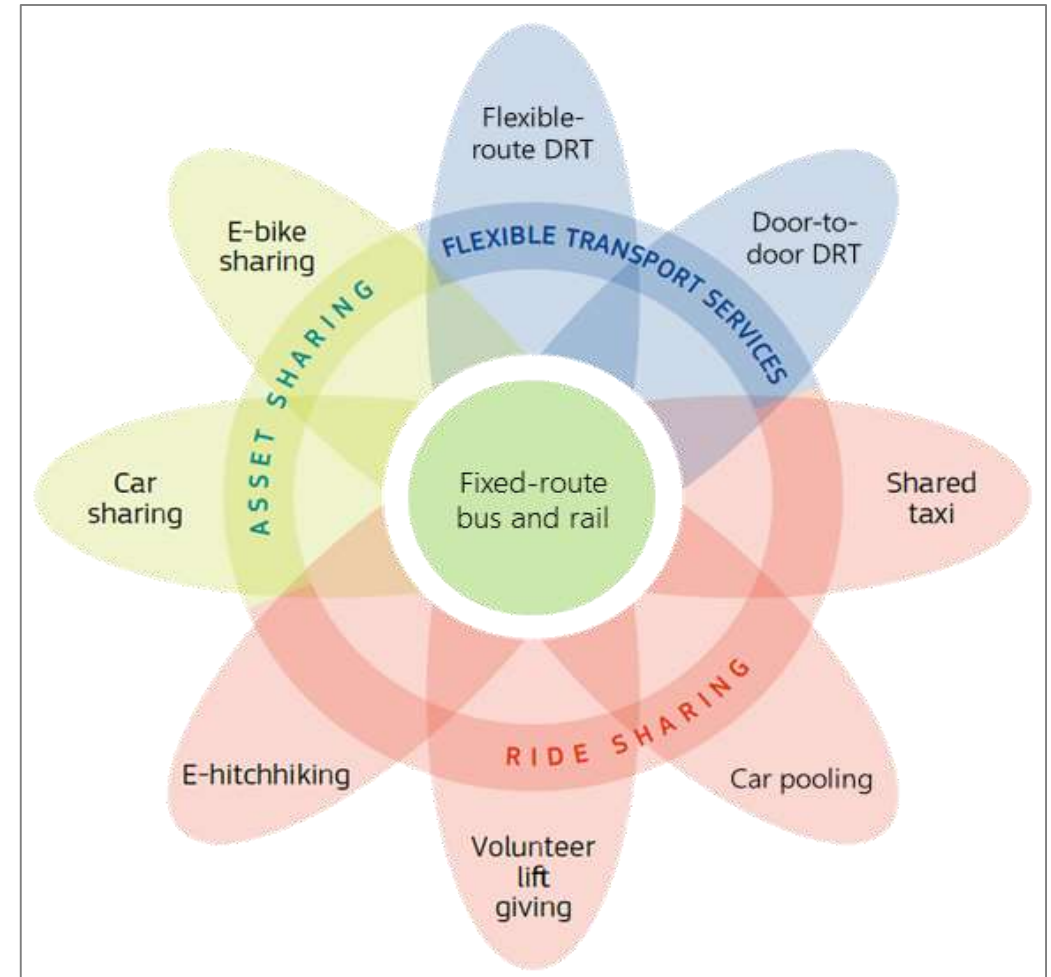

Elena Bargagna

1° online ERMN event –6° June 2023

Purpose

- SMARTA-NET aims to support rural municipalities and practitioners in the delivery of a blend of formal and informal forms of mobility services
- Sustainable and Shared Mobility and Transport Good Practices in different rural EU contexts exist!

What can rural municipalities really expect if they implement similar solutions?

Relevance

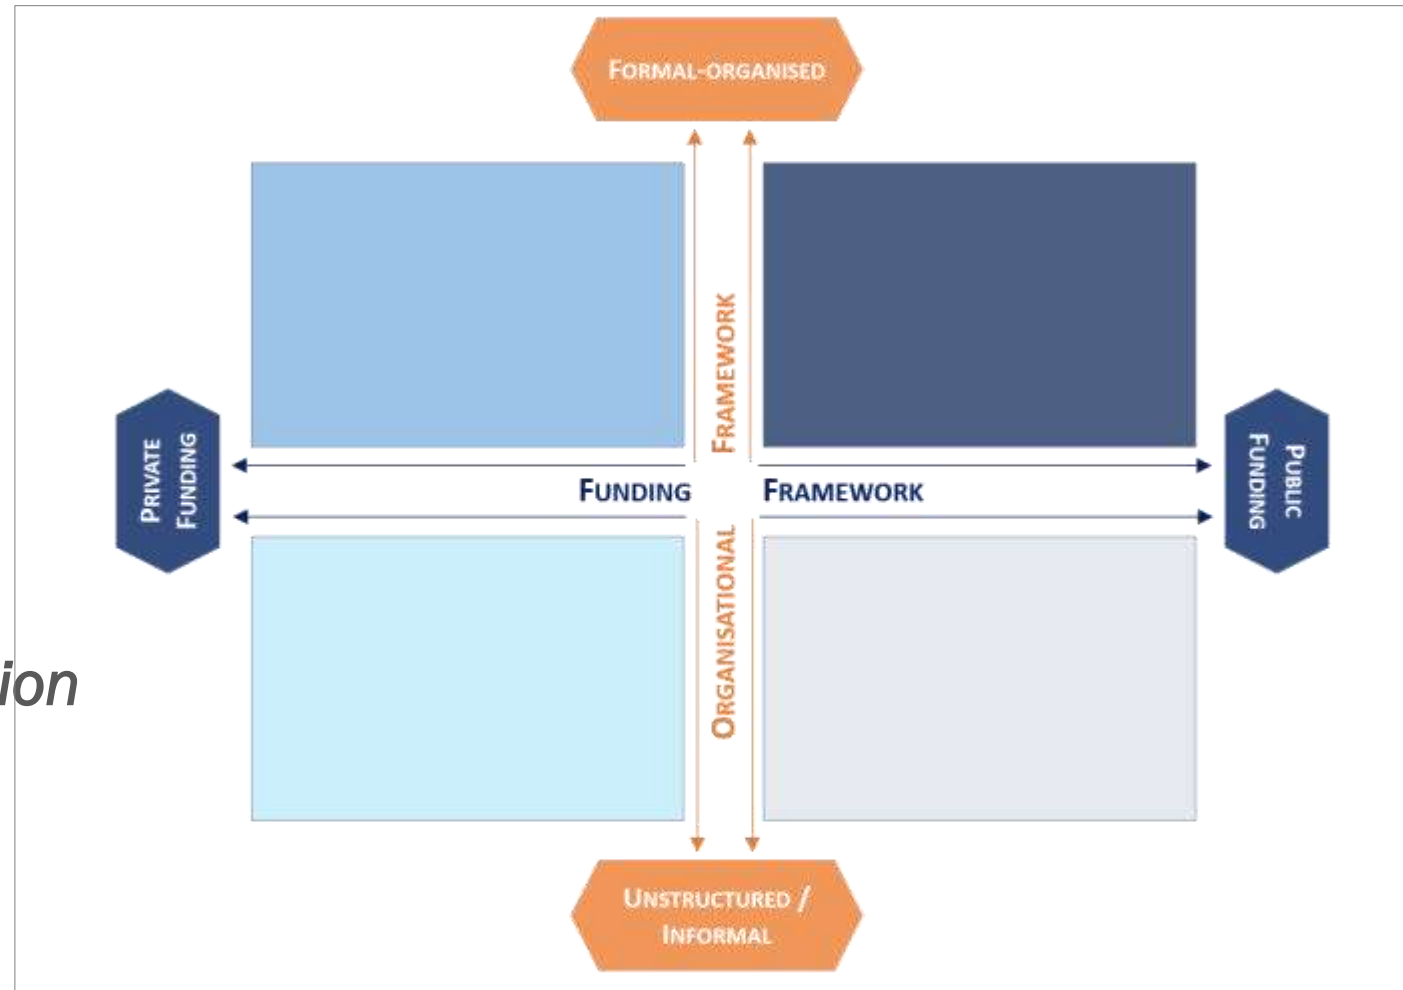

Sharing knowledge – experiences of peers and other implementers:

- the **current mobility and transport practices** successfully implemented in different EU territories
- the **financial and operational aspects** for the **long-term sustainability** of the identified good practices
- **success factors and transferability potential** of target solutions

Assessment and transferability analysis

- **Type of mobility solution**
 - Demand-Responsive Transport
 - Integrated PT
 - ...
- **Context conditions**
 - Site characteristics,
 - Organisational framework,
 - ...
- **Timing:**
 - Kick off of the service
 - Key milestones
 - ...
- **Success, Durability and Expansion**
 - Functionality,
 - Coverage area
 - ...
- **Financing:**
 - Front-loaded funds;
 - Operational costs;
 - ...

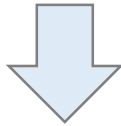

Target groups

Rural
Municipalities

Data and
details on
successful local
shared mobility
schemes
