

Task 7

Evaluations in SMARTA-NET

Geert Koops, Daniela Mattiuz (Panteia)

1st European Rural Mobility Network Meeting – 06.06.2023

Task 7 will bring multiple benefits

The evaluations in SMARTA-NET will enable lighthouse sites to:

Assess the impacts of recent external shocks (COVID-19, War in Ukraine) on the rural region, while also taking into account the impact on other policy domains

Understand attitudes and behaviours of individuals towards innovative ways of sharing mobility better

Learn how adaptable the considered municipality is to uncertainty, by analyzing current attitudes and recent evolutions in mobility policy making

Know whether rural mobility projects within the selected municipality can be considered best practices to make the region more resilient against future shocks.

Collaboration with Lighthouse sites

- Evaluations will give new knowledge and insights for Lighthouse Sites
- Iterative process with Lighthouse Sites to improve the evaluation framework => “tailor-made” framework

Thank you for your attention!
