

Feedback on *“Influencing rural-sensitive mobility policies and planning at regional, national, and European level”* workshop

3rd ERMN Meeting – 31st January 2024

Often Policies for rural areas are focused only on the links between urban and rural areas

Think multimodal policies: Transport as a System

Promote the concept of Functional region and sustainable regional mobility plan

Coordination with National/Regional/local frameworks

Need to have data to create convincing cases

Fostering rural mobility policy changes:

- 1) Acknowledgement of the problem
- 2) Awareness and knowledge of a possible solution and
- 3) Setting up an agenda to trigger political decisions

Challenges of bringing the door-to-door idea at the national level

Engagement of different actors, agencies, etc.
