

# Workshop: Systemic Aspects of Climate Change

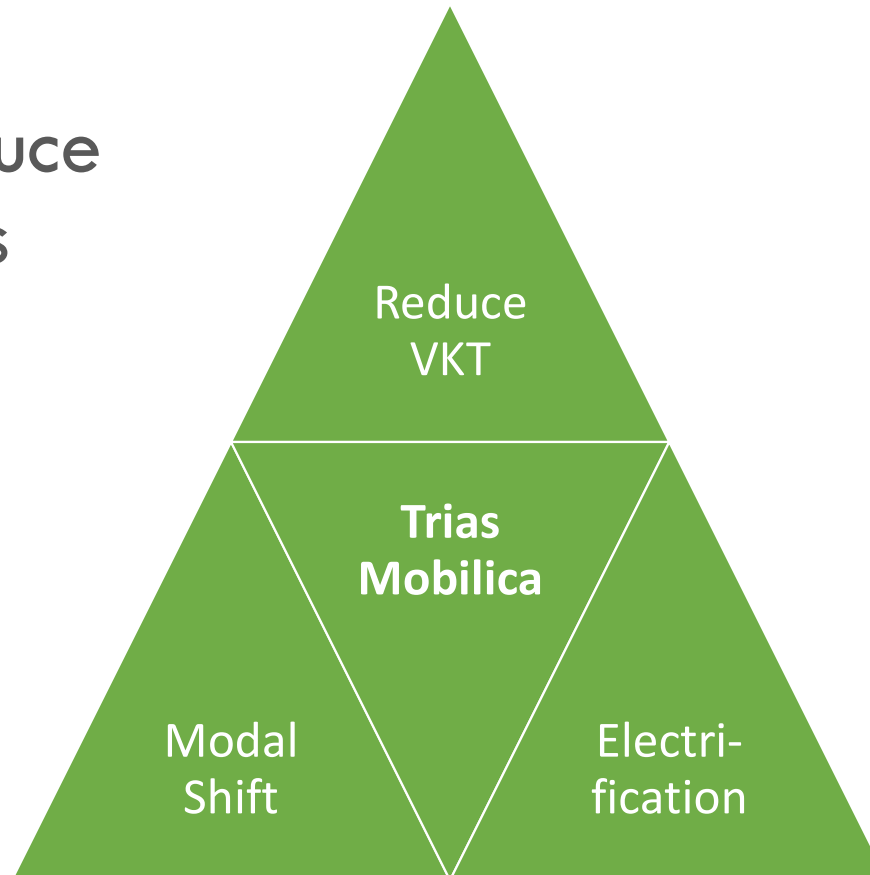

**Daniela Mattiuz & Geert Koops**  
Final Conference – 24.10.2024

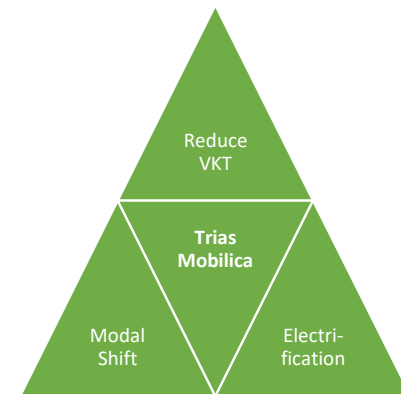

# Trias Mobilica explained

- 3 ways to reduce CO2 emissions

# Electrification not the only way

1. Reduce the demand for car-kilometers (VKT)
  - Working from home
  - Carpooling/ride-sharing
  - E-Shopping
2. Modal Shift
  - More cycling, PuT, and walking
3. Electrification

# Challenge: Reduce VKT & depopulation

- In rural areas more and more amenities are closing because of depopulation
- Less amenities → more travel km to reach a doctor, supermarket etc.
- **How to still reduce VKT in your area?**

**Thank you for your attention!**
